

## Year 10 IST 2017 – Apple Developer Program Instructions

For the Year 10 IST course all students need to purchase an Apple Developer Program subscription. This costs \$149/year and allows for the distribution of apps on the App Store. It also provides access to beta versions of iOS and Xcode along with the ability to include advanced capabilities within apps (such as CloudKit, GameKit, etc.). For full details see:

<https://developer.apple.com/programs/whats-included/>

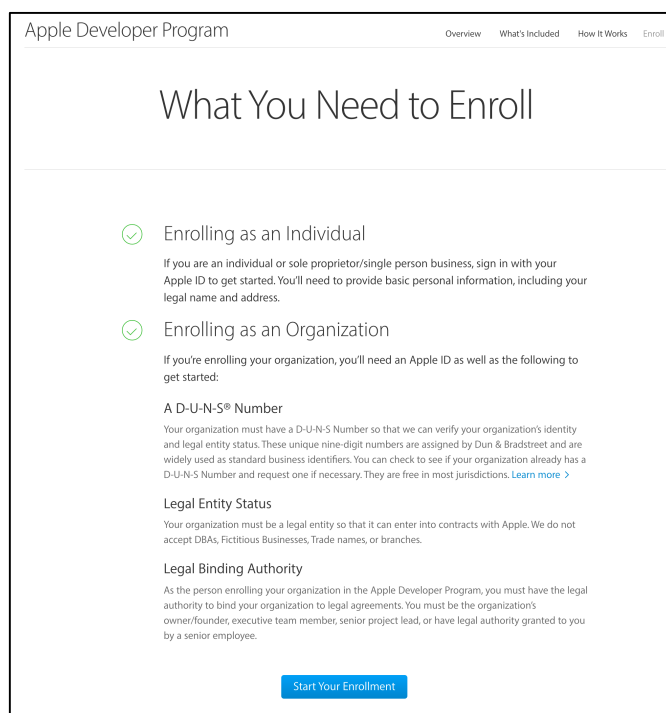

**The account must be under the name of your parent** as Apple requires all developer accounts to be held by someone 18 years or older. However, they permit developers 13 years and older to use their parent's account, so you are permitted to use the account held by your parent. **Do not try and sign-up under your own name, as this will likely create problems in the future.**

Since you will be using the details of one of your parents, and will need their credit card for payment, make sure you discuss and follow these instructions with your parents. You should also make sure that the name you use on the Apple ID account matches the name on the credit card being used for payment.

**You should create a brand new Apple ID for your developer account.** As you will need the username and password for the Apple ID account you do not want to be using your parent's consumer Apple ID, nor do you want to pollute your own consumer Apple ID with the developer subscription. It is best practice to keep your developer account completely separate in its own Apple ID.

The instructions in this document will step you through the sign-up process. Note, sometimes it can take a week for the application to go through – as Apple does occasionally require identity verification.

1. Go to <https://developer.apple.com/programs/enroll/> to commence the sign-up process (you will be enrolling as an individual). Click the **Start Your Enrollment** button.

2. You will need to login using the Apple ID you wish to use for the developer account. This is the point you should create a new Apple ID (if not done already). Click the **Create Apple ID** button.

This will take you to the Create Apple ID webpage.

**IMPORTANT:** When creating the new Apple ID you need to make sure that the name, date of birth, etc. details you provide are the details of one of your parents. Remember, this Apple ID is under their name!

The Apple ID itself (i.e. the username for the account) is an email address. So, you will need a new email address purely for your developer account. There are a few options here:

- (a) Create a new Gmail account (e.g. [bobsmithdevelopment@gmail.com](mailto:bobsmithdevelopment@gmail.com)). The email address can contain your name and can be under your name. It's only the Apple ID account that needs to be under your parents name.
- (b) If you have an existing Gmail email address then you can use an alias on that address. For example, if you have an email address [bobsmith@gmail.com](mailto:bobsmith@gmail.com) then you can receive messages sent to [bobsmith+development@gmail.com](mailto:bobsmith+development@gmail.com) and can use that as your Apple ID email address (you can put anything after the + symbol. For more information on Gmail email aliases see: <https://support.google.com/mail/answer/12096?hl=en>).

**Note:** I suggest that you keep the Apple ID for your developer account reasonably professional, so if you have a Gmail address which perhaps does not sound particularly professional then you should create a new Gmail account with a more appropriate email address.

3. Once you have created the new Apple ID, login using that Apple ID.

4. The account holder (i.e. your parent who holds the Apple ID) will need to agree to the Apple Developer Agreement.

This is a legal agreement between you and Apple.

[Download PDF](#)

THIS IS A LEGAL AGREEMENT BETWEEN YOU AND APPLE INC. ("APPLE") STATING THE TERMS THAT GOVERN YOUR PARTICIPATION AS AN APPLE DEVELOPER. PLEASE READ THIS APPLE DEVELOPER AGREEMENT ("AGREEMENT") BEFORE PRESSING THE "AGREE" BUTTON AND CHECKING THE BOX AT THE BOTTOM OF THIS PAGE. BY PRESSING "AGREE," YOU ARE AGREEING TO BE BOUND BY THE TERMS OF THIS AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, PRESS "CANCEL".

### Apple Developer Agreement

1. **Relationship With Apple; Apple ID and Password.** You understand and agree that by registering with Apple to become an Apple Developer ("Apple Developer"), no legal partnership or agency relationship is created between you and Apple. You agree not to represent otherwise. You also certify that you are at least thirteen years of age and you represent that you are legally permitted to register as an Apple Developer. This Agreement is void where prohibited by law and the right to register as an Apple Developer is not granted in such jurisdictions. Unless otherwise agreed or permitted by Apple in writing, you cannot share or transfer any benefits you receive from Apple in connection with being an Apple Developer. The Apple ID and password you use to log into your Apple Developer account cannot be shared in any way or with anyone. You are

☐ By checking this box I confirm that I have read and agree to be bound by the Agreement above. I also confirm that I am of the legal age of majority in the jurisdiction in which I reside (at least 18 years of age in many countries).

[Cancel](#) [Submit](#)

5. The next screen will show all the details for the Apple ID. Verify these are correct (i.e. you have logged-in with the correct Apple ID). Under "Entity Type" you need to select **Individual / Sole Proprietor / Single Person Business**.

### Apple ID Information

The information on this Apple ID account will be used for verification and legal agreements, so please make sure your legal name and country are correct. To edit your account information, [contact us](#).

 **Please note:** In order for your company name to be listed as the seller on the App Store, your company must be recognized as a legal entity in your country. Sole proprietors and single person companies located in countries where they are not recognized as legal entities will be enrolled and be listed for download under the enrollee's personal legal name, if selected for distribution by Apple.

[Cancel](#) [Continue](#)

*The warning message that appears indicates that because you are not a company (legal entity) the seller's name that appears on the App Store will be the name under which the Apple ID is registered (i.e. your parent's name). Unfortunately, short of starting an entire company, there is no way around this to get a different name to appear.*

Click **Continue**.

6. On the next screen, provide your contact information (do not try and change the Legal Name either – this will be pre-populated based upon the name of the Apple ID). Your parent will also need to agree to the Apple Developer Program License Agreement at the bottom of the page.

### Contact Information

The name on this Apple ID account will be used as your seller name, and for contracts and banking, if your app is selected for distribution by Apple. Make sure that it is your legal name and that your country is correct. To edit your account information, [contact us](#).

### Apple Developer Program License Agreement

This is a legal agreement between you and Apple.

[Download PDF](#)

Once completed, click **Continue**.

7. On the next screen, verify that all your information is correct and click **Continue**.

8. On the next screen, it provides instructions to complete the purchase of the developer program, with the cost and duration confirmed.

### Complete Your Purchase

Once you complete your purchase, you will receive a purchase acknowledgement and a membership confirmation email.

Membership	Apple Developer Program
Cost	A\$ 149
Duration	1 year
Enrollment ID	

### Automatic Renewal

Automatically renewing your annual membership ensures that your apps remain available and that you maintain access to membership benefits. You can change this setting any time in [Member Center](#).

☐ By checking this box and clicking the Submit button, I give permission to Apple to automatically charge the default credit/debit card associated with my Apple ID to renew my membership, subject to the following:

- I will be billed on an annual basis for A\$ 149. Taxes may apply.
- I can cancel automatic renewal at any time up to 24 hours before my renewal date by clicking the "Disable" button in the automatic renewal settings in the Programs & Add-ons tab in Member Center.
- Apple will notify me of the upcoming charge before processing my automatic renewal.
- If Apple changes the membership price, I will be notified of the new price before I am charged and can opt-out by clicking the "Disable" button in the automatic renewal settings in the Programs & Add-ons tab in Member Center.
- If the payment for my membership cannot be transacted for any reason, Apple will not process my automatic renewal and will notify me with instructions on how to manually renew my membership.

Cancel

Purchase

You **DO NOT** need to tick the box under the Automatic Renewal heading, unless you would like to automatically renew the subscription each year – which is not really necessary for you, as you can manually renew each year.

*The reason for this option is because an active subscription is required to keep apps on the App Store (i.e. if your subscription lapses, your apps will be delisted). This is a more critical issue for larger developers and companies, in the event they forget to renew and their apps disappear from the store!*

9. Finally, click **Purchase** to proceed to the Apple Store website to complete the purchase. You should login with the developer account Apple ID and then provide the credit card details for your parent whose name the account is under (make sure the name on the credit card matches the name on the Apple ID account, to minimise the chance that Apple will require identity verification requirements for the transaction).

You can let your parents know that they can (and probably should) remove their saved credit card details from that Apple ID after the developer account payment has been processed, for security and to avoid any accidental charges when that Apple ID is used by you for development.
